

## Summary

Innovation is constantly pushing organizations forward to adopt new processes, technologies and proceedings. At the same time, these need to be integrated with legacy systems, for which there is often no reason to change. TOGAF™ is offering a pragmatic global framework that helps organizations to define, implement and manage their information flows and technology architecture. This course highlights the benefits of using TOGAF™ to create a well-designed enterprise architecture and details the processes to maintain it as a constant architecture governance framework.

## Course Objectives

- ☐ To introduce the basic concept of enterprise architecture management
- ☐ To provide an overview of the TOGAF™ framework
- ☐ To understand how TOGAF™ can be applied to support the design and implementation of enterprise architecture management
- ☐ To prepare for the TOGAF™ Foundation certification

## Content

1. Introduction to Architecture Management
2. Introduction to the TOGAF™ Framework
3. Architecture Development Method
4. Guidelines and Techniques
5. Architecture Content Framework
6. Enterprise Continuum and Tools
