

Summary

COBIT® provides an end-to-end business view of the governance of enterprise IT that reflects the central role of information and technology in creating value for enterprises. The last version of the framework (COBIT® 5) incorporates the latest thinking in enterprise governance and management techniques, and provides globally accepted principles, practices, analytical tools and models to help increase the trust in, and value from, information systems.

The set of best practices is intended to provide IT stakeholders, from senior executives to IT managers, with measures, indicators and processes that will assist them in maximizing the IT performance and developing appropriate IT governance and control in their organization.

Course Objectives

- ☐ To provide a good knowledge of the framework and its components
- ☐ To relate the framework with other standards and best practices
- ☐ To get insight in the prescribed roles and functions
- ☐ To create awareness on how to apply the framework in practice
- ☐ To prepare for the COBIT® Foundation Examination.
